

Intelligent Energy Management

Company Profile

Gael Force Wind Energy is an Irish Greentech company providing Operations Management for wind farm portfolios through services and software solutions.

The Gael Force Wind Portal can increase revenues by using real-time wind farm data to help the user optimise power production and minimise downtime. In addition, Gael Force software provides tools for compliance with grid operators, project lenders and health and safety.

About Us

- Over a decade of industrial experience in the full life-cycle of the wind energy sector
- International research experience in telecommunications and energy technologies

Benefits

- Increase wind farm revenue by:
 - Reducing downtime
 - Resolving curtailments
 - Policing maintenance contractors
- Reduce operating costs by:
 - Automating your monitoring, reporting and alerting functions
 - Providing one online portal for your entire wind farm portfolio

Services

Pallas Wind Farm, Ireland

“We found Gael Force Wind Energy to be highly proficient, timely and experienced in their deliverables, and they highlighted issues in our assets that we were not aware of”

Saorgus Energy Ltd

“Gael Force’s services and products identified losses in our wind farm that were independently verified at €50,000 over a 6 month period”

Pallas Wind Farm Ltd

“Having our wind farm as part of a varied investment portfolio, we took on the services of Gael Force based on their expertise, competencies and professionalism. To date, we have experienced the hands-off management of our assets, where Gael Force have exceeded all of our requirements”
